

ECOZONE

COMPOSITION

Each g contains:

Manganese (glycine chelate) 40 mg;

Zinc (glycine chelate) 40 mg;

Iron (glycine chelate) 15 mg;

Copper (glycine chelate) 8 mg;

Iodine (potassium iodide) 5 mg;

Selenium (selenised yeast) 0.3 mg.

DESCRIPTION

ECOZONE is a mineral nutritional supplement for poultry. It has an excellent bioavailability and flowability with reduced dust formation, thus reducing the environmental. Besides, it is safe for people handling it and for animals.

Manganese: manganese plays an important role in a number of physiologic and enzymatic processes.

Zinc: Zinc plays important roles in growth and development, the immune response, neurological function, and reproduction.

Iron: Iron is an essential component of hundreds of proteins and enzymes supporting essential biological functions, such as oxygen transport, energy production, DNA synthesis, and cell growth and replication.

Iodine: Iodine is required by mammals for the synthesis of thyroid hormones, which are required throughout life for normal growth, neurological development, and metabolism.

Selenium: Selenium is a trace element that is essential in small amounts, being required selenium by a number of selenium-dependent enzymes.

Copper: Copper (Cu) is an essential trace element playing an important role in oxidation-reduction reactions and in scavenging free radicals.

CONTRAINDICATIONS

None described.

ADVERSE EFFECTS

None described.

SPECIAL PRECAUTIONS

None described.

ADMINISTRATION

Chickens for fattening and laying hens: 500 g/1000 kg feed

Breeders: 1000 g/1000 kg feed.

TARGET SPECIES

Poultry

WITHDRAWAL PERIOD

Zero days

STORAGE CONDITIONS

Store below 30 °C.

Protect from light.

SIZES

25 Kg

RECOMMENDED USE

ECOZONE is a complementary feed, rich in trace minerals.
