

# SELMAX-200

## DESCRIPTION

**SELMAX-200** has been developed considering the importance of Vitamin E and Selenium in immunity. It is also fortified with Biotin and Folic Acid, which are essential requirements for excellent physiological growth, reproduction, and maintenance of homeostasis in poultry, especially laying birds. **SELMAX-100** oral is a poultry supplement recommended to boost immune response in poultry, which can be influenced by genetic makeup, nutrition, environment, management etc. **SELMAX-100** helps combat free radical formation leading to a higher disease resistance by the birds.

## COMPOSITION

Vitamin E 20,000mg,  
Selenium 2000mg,  
1 liter excipient

## BENEFITS
